

# Global Storage & Information Management Services

## Summary

Despite being at the forefront of IT solutions, the global leader's legal compliance solution was lagging with manual updating and offline management. With over 225,000 customers and operations spanning 58 countries, they needed a reliable, scalable solution.

“ERM Libryo is efficient and effective solution for my day-to-day tasks. The legal updates are clear and concise, and the system is so easy to navigate. Overall, it saves me a ton of time.”

Compliance Officer

4 Users

3 Libryo Streams

307 Laws

3311 Sections of Law

Legal Categories:  
Environmental  
Health and Safety

## Challenges:

- During the pandemic, the organization signed up to Libryo's free COVID-19 Tracker, updating them of new EHS regulations
- With new laws and advice coming thick and fast, they saw huge benefit in having an automated system that would alert them of their relevant legal updates and provide summaries  
Before Libryo, they kept manual legal registers and checklists for their audits which required constant maintenance, legal research time and comparison across their different locations
- For the non-English speaking countries, the health & safety managers also needed to use Google Translate for each regulation
- Needed a digital solution to automatically track legal changes, notify the relevant local health and safety manager and collaborate

## Solution:

- **Libryo Requirements** – Digital, customized legal registers configured to twenty operational sites
- **Libryo Updates** – Platform and email notifications of any legal updates to be aware of and address
- **Libryo Tasks** – Stay on top of compliance to-do lists, set compliance-related actions and plan ahead
- **Libryo Drives** – Store your compliance documents centrally for easy access and referencing during audits
- **Libryo Assess** – Gain visibility of the compliance status across twenty operations and complete self-assessments

## Benefits:

- Every operation has its own customized, digital legal register that is kept up-to-date automatically
- Each health & safety manager saves substantial time looking for relevant laws and legal updates with Libryo's automated tracking
- Everything that needs to be acknowledged is sent as a daily legal update to their email and summarized for quick understanding
- Users can view just the sections of law that apply to their locations and business activities, taking away the need to search through large legislative documents
- The Compliance Officer for EMEA can see an overview of the current compliance in each location and spot potential areas of risk that need corrective action
- They can effortlessly compare each site's legal requirements, updates and compliance by using Libryo's Multi-Stream mode
- All users collaborate on the platform, setting tasks for themselves or others and maintaining their legal compliance documentation in a shared drive for streamlining future compliance audits
- Libryo's translation functionality has slashed the time taken to search for and understand legal requirements and empowered non-English speaking health & safety managers to confidently manage their location's compliance
- In 2021, the organization signed the Amazon Climate Pledge, setting the goal to be carbon neutral by 2040. ERM Libryo's platform will help them to evidence their legal compliance efforts towards achieving this goal.
