# TE Connectivity

Summary
TE Connectivity is a global technology company that designs and manufactures connectors, sensors, relays, contactors and application tooling. TE wanted to protect its people, its customers and the environment by managing its compliance and knowing its legal obligations. However, knowing and tracking info this was a big challenge for them.

"The beauty of the Libryo platform is we have a reliable source that we can update and reference at any time. Teams get concise information and understand exactly what has changed and needs their attention to remain compliant."

Steve Detsicas, EHS Leader

Environmental
Health and Safety
Quality

Challenges:

- Keeping up-to-date with changing legislation globally, regionally and locally.
- Prior to Libryo, they looked for legal requirements manually through approved codes of practice, local site knowledge or published regulations by local governments to cross-reference their relevant regulations and sections of law.
- TE needed a solution to tell them what is applicable, what has changed and what are the key things that impact the business.
- Every site operates ISO 14001 and ISO 45001 standards, so they needed a system to help them maintain these standards.

Solution:

- **Libryo Requirements** – Digital, customized legal registers configured to twenty operational sites
- **Libryo Updates** – Platform and email notifications of any legal updates to be aware of and address
- **Libryo Tasks** – Stay on top of compliance to-do lists, set compliance-related actions and plan ahead
- **Libryo Drives** – Store your compliance documents centrally for easy access and referencing during audits
- **Libryo Assess** – Gain visibility of the compliance status across twenty operations and complete self-assessments

Benefits:

- Libryo's digital platform is perfect for TE's complex, multi-national business.
- Libryo ensures that the legal requirement information specific to each TE Connectivity site is known and tracked for ongoing legal requirement changes.
- Teams have access to custom legal registers for evaluating their compliance, they can quickly see where they are fully compliant and where there are more opportunities for improvement.
- Users can look at an up-to-date legal register for an operational site in any of their countries.
- The legal requirements are translated so users speaking other languages can do their own due diligence to check what is required and if they comply.
- As the business changes and any operational activities, Libryo can quickly apply these changes and any new applicable legal requirements are added to the operational sites automatically.
- Libryo keeps its users informed without it being too intrusive. You only receive emails and notifications when something relevant has changed and needs action.
- Live Chat function for instant help on the platform.
- Straight-forward onboarding process, taking very little time to get up and running. The intuitive system and knowledge base helps you navigate the platform with ease.
- Visibility of which sites are using the system, who is accessing it, what regulations have changed and if actions have been addressed.
